Subject: Safe level of Glyphosate
Date: Monday, June 12, 2017 1:19:36 AM

Dear Esther, Please do whatever you can to save our great nation and the state of California. Glyphosate is not safe and Roundup is even more unsafe than glyphosate alone. Im 70 years old. We did not have glyphosate in my childhood and the people of my age are , many of them , very healthy and living long lives. I live in India for half of the year and Im sorry to say that the food supply in India seems to be safer than that of the U.S. People in rural India , till now, rarely get cancer . Turn the clock back on toxic chemicals . Thankyou very much for your work. Saving the health of Americans should be a priority Cherry Misra, Saratoga, CA
